

ABSOLUTE RETURN INCOME OPPORTUNITIES FUND

Class U£inc ISIN: IE00BLY1NS47

Janus Henderson
INVESTORS

A sub fund of Janus Henderson Capital Funds plc

Objectives and Investment Policy

The Fund aims to obtain a positive total return (capital growth & income) on your investment over time while seeking to limit losses to capital. A positive return is not guaranteed over any time period and consequently your capital is at risk.

The Fund focuses on investments worldwide (including countries that are still developing) in bonds and other debt securities (debt that is issued by a government or a company that can be bought and sold and which gives the right to receive income). The Fund is not constrained to investing in any single market or country segment or sector.

The Fund mainly invests in bonds and other debt securities which are rated investment grade (high quality), high yield or are unrated by ratings agencies. High-yield debt securities are debt securities which are rated below investment-grade by ratings agencies because of a higher risk of not being paid back, or if unrated, are of similar quality. High-yield debt securities typically offer a higher income.

The Fund invests in securities of different duration but the average portfolio duration of the Fund (a measure of a bond's sensitivity to interest rate movements) is expected to be between -4 and +6 years.

The Fund will make significant use of financial derivative instruments (complex financial instruments) to try to enhance returns or to reduce the risk of loss or to manage duration.

The Fund may invest in other types of eligible investments which are disclosed in the Prospectus for example equities (company shares) and equity-related derivatives in companies of any size, including small capitalisation securities (smaller companies) as well as cash and money market instruments.

You may sell your shares generally daily (i.e. on a business day for the Fund).

This share class pays you a dividend (income).

Risk and Reward Profile

The category is calculated based on historical data and is based on price movements in the share class (volatility), and may not be a reliable indicator of future risk. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean the investment is risk-free.

This share class is in category 5 because of rises and falls in its value in the past.

The risk category does not take into account the following risks of investing in this share class:

Component Fund: This fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.

Investment Risk: The value of an investment and any income from it can go up or down, and the Fund may not achieve its investment objective. When you sell your shares they may be worth less than you paid for them.

Default Risk: An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates: When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.

High Yield Bonds: The Fund invests in high yield (non-investment grade) bonds and while these generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

Emerging Markets: Emerging markets expose the Fund to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events, and may be less well regulated with less robust custody and settlement procedures.

Country or Region: If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

Derivatives and Leverage: The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates: If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

Liquidity: Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Charges to Capital: Some or all of the Annual Management Charge and other costs of the Fund may be taken from capital, which may erode capital or reduce potential for capital growth.

For a more detailed explanation of risks, please refer to the "Risk Factors and Special Considerations" section of the Prospectus.

Charges

These charges are used to pay the costs of running the Fund, including the costs of marketing and distributing. Overall, they reduce the growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	0.75 %
----------------	--------

Charges taken from the Fund under specific conditions

Performance fee	None
Switching charge	None

The charges shown are the maximum figures. In some cases you might pay less. You can find out your actual charges from your financial adviser.

The ongoing charge is based on the previous year's expenses for the year ending December 2018. This figure excludes portfolio transaction costs and may vary from year to year. You can find out more details about the charges by looking at the Fees and Expenses section of the Fund's prospectus.

Past Performance

Class U£inc

Past performance is not a reliable guide of future performance.

Past performance does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

The performance of the class is calculated in GBP.

The Fund launched on 29 September 2014. This class started to issue shares on 20 October 2014.

Practical Information

The depositary is Citi Depositary Services Ireland Designated Activity Company.
