

GLOBAL EQUITY MARKET NEUTRAL FUND

Class H€ Acc (hedged) ISIN: LU1807487845

A sub-fund of Janus Henderson Fund, a SICAV managed by Henderson Management S.A.

Objectives and investment policy

Objective

The Fund aims to provide an absolute (more than zero) return, typically over a 12-month period. An absolute return performance is not guaranteed over this specific, or any other, time period and consequently your capital is in fact at risk.

Investment policy

The Fund typically invests in:

Shares of or derivatives of shares of global companies. The Fund takes long positions on shares it believes are promising (meaning that the Fund will gain to the extent these share prices rise) and takes short positions in shares it believes are likely to decline in price (meaning the Fund will gain to the extent these share prices fall).

A substantial proportion of the Fund's assets may at any time consist of cash and near cash securities.

In choosing investments, the investment manager adopts a market neutral strategy balancing long and short positions with the aim to minimise the effects of market exposure and benefit from future price divergence between long/short pairs.

The Fund makes extensive use of investment techniques, particularly those that involve derivatives, to obtain both its long and short investment exposure.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short term.

This Fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

Terms to understand

Derivatives Financial instruments whose value is linked to the price of an underlying asset (eg indices, rates, share prices).

Long Position Taking a positive view on a security to profit from a rise in its price.

Money market instruments A short term debt instrument, issued by a government or company as a way to raise money. Generally considered a cash equivalent.

Shares / Equities Securities that represent fractional ownership in a company.

Short Position Taking a negative view on a security to profit from a fall in its price.

Volatility How sharply the Fund's share price has gone up and down over a period, generally several years.

You can buy, sell or switch shares in the Fund on any business day, as defined within the "Glossary" Section, of the Fund's prospectus.

The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Risk and reward profile

♦ Potentially lower reward			Potentially higher reward ♦			
♦ Lower risk			Higher risk ♦			
1	2	3	4	5	6	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 3 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in share price in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Active management risk Active management techniques that have worked well in normal market conditions could prove ineffective or detrimental at other times.

Counterparty risk The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.

Derivatives risk Derivatives use exposes the Fund to risks different from, and potentially greater than, the risks associated with investing directly in securities and may therefore result in additional loss, which could be significantly greater than the cost of the derivative.

Emerging markets risk Emerging markets are less established and more prone to political events than developed markets. This can mean both higher volatility and a greater risk of loss to the Fund than investing in more developed markets.

Equities risk Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Hedging risk If the Fund or a specific share class of the Fund seeks to reduce risks (such as exchange rate movements), the measures designed to do so may be ineffective, unavailable or detrimental.

Leverage risk Leverage arises from entering into contracts or derivatives whose terms have the effect of magnifying an outcome, meaning profits and losses from investment can be greater.

Liquidity risk Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.

The full list of the Fund's risks are contained in the "Investment and Risk Considerations" section of the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*	
Entry Charge	5.00%
Exit Charge	0.00%
Switch Charge (applicable within this SICAV)	0.00%

* The charges shown are maximum figures. In some cases you may pay less.

Charges taken from the Fund over a year	
Ongoing Charges	0.97%

The ongoing charge figure is estimated because the share class has insufficient track record for us to calculate it exactly.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

Charges taken from the Fund under certain specific conditions	
Performance fee	20.00%*

*20% of any returns that, subject to a High Water Mark, the Fund achieves above the Euro Main Refinancing Rate. The actual amount charged in the Fund's last financial year amounted to 0.00%.

For more information about charges, please see the "Charges" section of the Fund's prospectus.

Past performance

The past performance is calculated in EUR.

The Fund launched in February 2017.

Insufficient data is available to provide past performance figures.

Past performance is not a guide to future performance.
