

# GLOBAL EQUITY FUND

Acc ISIN: GB0007018194

A unit trust, managed by Henderson Investment Funds Limited.

## Objectives and investment policy

### Objective

The Fund aims to provide capital growth that is above the average growth expected from global equity markets.

The Fund invests principally in:

- A concentrated portfolio of shares of companies, in any industry and country, with a bias to companies that the investment manager considers to offer sustainably high levels of growth

The Fund may also invest in:

- Collective Investment Schemes
- Money market instruments
- Cash and cash equivalents
- Bank deposits

In choosing investments, the investment manager looks for companies that appear to have greater potential to rise in price over the long term than is reflected in current market prices.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

**Recommendation:** this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This Fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

**Fund currency** GBP **Share class currency** GBP

### Terms to understand

**Money market instruments** A short term debt instrument, issued by a government or company as a way to raise money. Generally considered a cash equivalent.

**Shares / Equities** Securities that represent fractional ownership in a company.

**Volatility** How sharply the Fund's share price has gone up and down over a period, generally several years.

**Derivatives** Financial instruments whose value is linked to the price of an underlying asset (eg indices, rates, share prices).

You can buy, sell or switch units in the Fund on any business day, as defined within the "Definitions" Section of the Fund's prospectus.

The Fund offers accumulation units (units in which net income is retained within the price).

## Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 5 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in share price in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

**Active management risk** Active management techniques that have worked well in normal market conditions could prove ineffective or detrimental at other times.

**Concentration risk** The Fund may have a particularly concentrated portfolio (low number of holdings) relative to its investment universe and an adverse event impacting only a small number of holdings can create significant volatility or losses for the Fund.

**Counterparty risk** The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.

**Derivatives risk** Derivatives use exposes the Fund to risks different from, and potentially greater than, the risks associated with investing directly in securities and may therefore result in additional loss, which could be significantly greater than the cost of the derivative.

**Equities risk** Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

**Exchange rate risk** Changes in currency exchange rates may cause the value of your investment and any income from it to rise or fall.

**Liquidity risk** Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.

The full list of the Fund's risks are contained in the "Risk Warnings" section of the Fund's prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

### One-off charges taken before or after you invest\*

**Entry Charge** 4.25%

**Exit Charge** 0.00%\*\*

\* The charges shown are maximum figures. In some cases you may pay less.

\*\* Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

### Charges taken from the Fund over a year

**Ongoing Charges** 2.09%

The ongoing charges are based on last year's expenses for the year ending 31 May 2017. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information about charges, please see the "Charges" section of the Fund's prospectus.

## Past performance

Warning: 10 May 2010. The Fund changed its name and objective. The past performance shown before this change was therefore achieved under circumstances that no longer apply.

The past performance is calculated in GBP.

The Fund was launched in February 1982 and the share class was launched in February 1982.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except entry charges.
