

ASIAN DIVIDEND INCOME UNIT TRUST

Acc ISIN: GB00B58RLX77

A unit trust, managed by Henderson Investment Funds Limited.

Objectives and investment policy

Objective

The Fund aims to provide an income in excess of the MSCI All Countries Asia Pacific Ex Japan Index, with potential for capital growth.

The Fund invests at least two-thirds of its total assets (after deduction of cash) in:

- Shares of companies in the Asia Pacific region (excluding Japan) in any industry

The Fund may also invest in:

- Shares of companies in other regions
- Bonds of any quality from any issuer
- Money market instruments
- Bank deposits
- Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS)

In choosing investments, the investment manager looks for stocks that appear to be undervalued and appear to have greater potential to rise in price over the long-term than is reflected in current market prices and offer prospects for above average dividends.

The Fund may use derivatives to achieve the Fund's investment objective, to reduce risk or to manage the Fund more efficiently.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This Fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

Fund currency GBP **Share class currency** GBP

Terms to understand

ABS and MBS A type of bond backed by the income stream from an underlying pool of assets, such as a loan or a mortgage.

Bonds Securities that represent an obligation to repay a debt along with interest.

Derivatives Financial instruments whose value is linked to the price of an underlying asset (eg indices, rates, share prices).

Money market instruments A short term debt instrument, issued by a government or company as a way to raise money. Generally considered a cash equivalent.

Shares / Equities Securities that represent fractional ownership in a company.

Volatility How sharply the Fund's share price has gone up and down over a period, generally several years.

You can buy, sell or switch units in the Fund on any business day, as defined within the "Definitions" Section of the Fund's prospectus.

The Fund offers both accumulation units (units in which net income is retained within the price) and income units (units in which net income is paid out to investors).

Risk and reward profile

♦ Potentially lower reward			Potentially higher reward ♦			
♦ Lower risk			Higher risk ♦			
1	2	3	4	5	6	7

The value of an investment and any income from it can go up or down. When you sell your units they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 5 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in share price in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Active management risk Active management techniques that have worked well in normal market conditions could prove ineffective or detrimental at other times.

Charges to capital risk Some or all of the annual management charge is taken from capital. This may constrain potential for capital growth.

Counterparty risk The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.

Derivatives risk Derivatives use exposes the Fund to risks different from, and potentially greater than, the risks associated with investing directly in securities and may therefore result in additional loss, which could be significantly greater than the cost of the derivative.

Emerging markets risk Emerging markets are less established and more prone to political events than developed markets. This can mean both higher volatility and a greater risk of loss to the Fund than investing in more developed markets.

Equities risk Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Exchange rate risk Changes in currency exchange rates may cause the value of your investment and any income from it to rise or fall.

Hedging risk If the Fund or a specific share class of the Fund seeks to reduce risks (such as exchange rate movements), the measures designed to do so may be ineffective, unavailable or detrimental.

Leverage risk Leverage arises from entering into contracts or derivatives whose terms have the effect of magnifying an outcome, meaning profits and losses from investment can be greater.

Liquidity risk Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.

The full list of the Fund's risks are contained in the "Risk Warnings" section of the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge 5.00%

Exit Charge 0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

Ongoing Charges 1.47%

The ongoing charges are based on last year's expenses for the year ending 31 July 2017. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information about charges, please see the "Charges" section of the Fund's prospectus.

Past performance

The past performance is calculated in GBP.

The Fund was launched in May 1994 and the units were launched in November 2009.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except entry charges.

Practical information

Trustee: NatWest Trustee and Depositary Services Limited.
