About the fund

The Fund aims to achieve a long-term return, in excess of the long-term return that is typically achieved from emerging equity markets, by investing at any given time at least two-thirds of its net assets in:

- companies having their registered office in emerging markets,
- companies that do not have their registered office in emerging markets but either (i) carry out a predominant proportion of their business activity in these markets, or (ii) are holding companies which predominantly own companies with registered offices in emerging markets.

The return will be a combination of capital and income returns.

In this context, the term "emerging markets" means countries included in the MSCI World Emerging Markets Index or those countries which are referred to by the World Bank as developing countries or those countries which are, in the Investment Manager's opinion, developing countries.

Glen Finegan joined Henderson in 2015 as Head of Emerging Markets Equities. Most recently, Glen was a senior portfolio manager at First State Stewart (formerly First State Investments) covering global emerging market all capitalisation equity strategies. He managed US\$3bn as lead manager and was co-lead managing US\$10bn of assets. While at First State, Glen was based in Edinburgh between 2001 and 2011, and in October 2011 he relocated to Singapore. Before joining First State Stewart in 2001, Glen spent three years working as a geophysicist within the oil and gas industry. Glen has both an MSc in Oceanography and a BEng (Hons) in Civil Engineering from the University of Southampton.

Nick Cowley joined Henderson in 2004 as a fund manager for North American equities and in 2012 transitioned into Emerging Market equities. In 2016 he became co-manager of an offshore Latin American fund and an offshore Emerging Markets fund. His career began at Chiswell Associates as a trainee fund manager for overseas equities before progressing to become a fund manager for US Equities.

Nick holds an MSc in Business Finance from Brunel University and a BSc (Hons) in Computer Science and Mathematics from York University. He also holds the Institute of Investment Management & Research (IIMR) qualification.

Please note that as of 1 March 2016, Nicholas Cowley also managed this fund. As of 1 February 2015, Glen Finegan took over sole management of this fund.

General risks

- The value of the funds and the income from them is not guaranteed and may fall as well as rise. You may get back less than you originally invested.
- Past performance is not a guide to future performance.

Risk profile

- This fund invests in shares, which may be more volatile than other asset classes such as cash or bonds. The fund may utilise derivatives for efficient portfolio management.
- As the fund invests in emerging markets, it is exposed to changes in exchange rates which may cause the value of investments to fall or rise independently of the underlying holdings.
- Emerging markets tend to be more volatile than more established markets and therefore your money could be at greater risk. Other risk factors such as political and economic conditions should be considered. Investment in the Fund represents an above average risk and so investors must be able to accept this risk.
- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
