PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

- The Fund is only suitable for investors who:
 - seek capital appreciation and intend to invest their money for the medium to long term; and
 - are comfortable with the volatility and risks of an Asian property equity fund.
 - The principal may be at risk.

Further Information

Refer to “Investment Objectives and Policies” and “Risk Factors” in the Singapore Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- The Fund is a sub-fund of the Janus Henderson Horizon Fund, a UCITS constituted in Luxembourg that seeks capital growth by investing in the quoted equity and equity related securities of companies or Real Estate Investment Trusts (or their equivalents) which are principally engaged in the property business in the Asia-Pacific region.
- The Fund currently offers Class A Accumulation (sub-class 2) and Class A Distribution (sub-class 3) Shares denominated in its Base Currency and certain other currencies.
- No distributions will be made in respect of Accumulation Shares.
- Periodical distributions of investment income and net realised and unrealised capital gains may be made to holders of Distribution Shares depending on the Distribution Share Class you are invested in. Distributions made in respect of the Distribution Shares may reduce the net asset value of Distribution Shares of the Fund.

Refer to “The Sub-Funds” in the Singapore Prospectus for further information on features of the product.

¹ The Singapore Prospectus is available and can be obtained during business hours from the Singapore Representative’s office or its distributors’ offices or accessible at www.janushenderson.com.

Investment Strategy	
<ul style="list-style-type: none"> The Fund invests at least 75% of its total assets in the quoted equity and equity related securities of companies or Real Estate Investment Trusts (or their equivalents) having their registered offices in the Asia-Pacific Region, which derive the predominant part of their revenue from the ownership, management and/or development of real estate in the region. The Fund has the ability to use financial derivative instruments for hedging and/or efficient portfolio management purposes. 	Refer to “Investment Objectives and Policies” and “Risk Factors” in the Singapore Prospectus for structure of the Fund.
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> The Company is Janus Henderson Horizon Fund. The Management Company is Henderson Management S.A. The Investment Manager is Henderson Global Investors Limited. The Sub-Investment Manager is Janus Henderson Investors (Singapore) Limited. The Depositary is BNP Paribas Securities Services, Luxembourg Branch. 	Refer to “Management and Administration” in the Singapore Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>There is no guarantee that investors will get back the invested amount given that the value of investments and its dividends are subject to market conditions and therefore may go up as well as down. These risk factors may cause you to lose some or all of your investment:</p>	Refer to “Risk Factors” in the Singapore Prospectus and “Investment and Risk Considerations in the Luxembourg Prospectus for further information on risks of the product.
Market and Credit Risks	
<ul style="list-style-type: none"> You are exposed to the market risks in Asia Pacific markets. <ul style="list-style-type: none"> The value of the investments in the Fund may go up or down due to changing economic, political, regulatory, social development or market conditions that impact the share price of the companies that the Fund invests in. You are exposed to the market risks in emerging markets. <ul style="list-style-type: none"> Emerging markets are less established and more prone to political events than developed markets, such as government intervention, remittance of funds or quota restrictions, unorthodox custody practices, unproven trading programs and uncertain legal rights. This can mean both higher volatility and a greater risk of loss to the fund than investing in more developed markets. You are exposed to currency risk. <ul style="list-style-type: none"> Assets of the Fund may be denominated in a currency other than the Base Currency of the Fund. Changes in the exchange rate between the Base Currency and the currency of the asset may cause the value of your investment and any income from it to rise or fall. You have greater exposure to market risks as this is an equity fund. <ul style="list-style-type: none"> Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result. 	
Liquidity Risks	
<ul style="list-style-type: none"> The Fund is not listed and you can redeem only on Dealing Days. <ul style="list-style-type: none"> There is no secondary market for the Fund. All redemption requests should be made to the Investment Manager. Flexibility in redemption may be restricted. <ul style="list-style-type: none"> The Fund may, under the Articles of Incorporation, defer the redemptions or suspend the determination of the net asset value of the shares of the Fund in certain circumstances. Difficulty in realising the value of investments readily may delay payment of redemption proceeds. <ul style="list-style-type: none"> Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses. 	

Product-Specific Risks

- You are exposed to derivatives risks.
 - Derivatives use exposes the Fund to risks different from and potentially greater than, the risks associated with investing directly in securities and may therefore result in additional loss, which could be significantly greater than the cost of the derivative.
- You are exposed to property securities related risks
 - There are special risks associated with investment in securities of companies engaged in property markets. These include the cyclical nature of property values, increases in property taxes, changes in zoning laws, regulatory limits on rents, environmental risks, depreciation in the value of buildings over time, and increases in interest rates.
- You are exposed to OTC market risks.
 - Investments in OTC markets are speculative and relatively illiquid, hence are subject to high volatility. OTC investment's valuation may be difficult to obtain as reliable information of the issuers and the risks associated to the issuers' business is not publicly available. OTC derivatives have the risk of incorrectly valuing or pricing and they may not fully correlate with the underlying assets. Investment in OTC markets carries the risk that a counterparty may default on its obligations. In the event of a bankruptcy or insolvency of a counterparty, the Fund could experience delays in liquidating the position and significant losses.
- You are exposed to hedging risks.
 - Any attempts to reduce certain risks may not work as intended. Any measures that the Fund takes that are designed to offset specific risks may work imperfectly, may not be feasible at times, or may fail completely.
- You are exposed to concentration risks.
 - Investing in a limited number of issuers, industries, type of securities or within a limited geographical can be more risky than investing more broadly. The Fund's value may fall where the area of concentration is heavily affected by an adverse event.
- You are exposed to securities lending risks.
 - The Fund may lend its portfolio securities to financial institutions and expose to the risk that the borrower defaults and fails to return the borrowed securities. The loaned securities may be secured by cash collateral that may be reinvested and may incur losses or underperforms relative to other investment options. Parties in a securities lending transaction may fail to comply, either inadvertently or purposely, with either contractual covenants or laws and regulations governing securities lending activities. There are also operational issues including market or exchange problems, miscommunication between lenders and borrowers regarding the terms of transactions between them, failed reconciliations, missed record dates, incorrect tax entitlements, etc.

FEES AND CHARGES

WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT?

Additional fees may be imposed and payable to appointed distributors that are in addition to the maximum Sales Charge disclosed below.

Payable directly by you

You will need to pay the following fees and charges as a percentage of your gross investment sum:

- Sales Charge** ▪ Up to 5% of the total amount invested (which equals a maximum of 5.26% of the NAV of the Shares)
- Trading Fee** ▪ Up to 1% of the gross amount being redeemed if redeemed within 90 calendar days of purchase
- Switching Fee** ▪ Up to 1% of the gross amount being switched between Sub-Funds

Payable by the Fund from invested proceeds

The Fund will pay the following fees and charges to the Investment Manager, Administrator, Depositary and other parties:

- Management Fee**
 - Current: 1.20% (per annum)
 - Maximum: 1.50%

Retained by the Management Company: 29% to 100% of the Management Fee*

Paid by the Management Company to distributor / financial adviser (trailer fee): 0% to 71% of the Management Fee*

Refer to "Fee, Charges, and Expenses" in the Singapore Prospectus for further information on fees and charges.
